

STOPS ODOURS!

ACTIVATOR AND DIGESTER FOR

ANIMAL WASTE

MANUGEST is a complete blend of natural ingredients, providing three levels of nutrients for the starter microbiological culture. MANUGEST promotes multiplication of desirable bacteria, and ensures their sustained growth.

Regular use of MANUGEST reduces solids in the waste pit and eliminates or reduces odours, discourages flies, and provides a higher quality, safer to use, liquid manure. MANUGEST is non-chemical, non-toxic, completely safe to handle, store and use. 100% biodegradable!

DIRECTIONS

Sprinkle directly over the waste in the collectors, or premix with water before direct application to storage pit.

For Hog Waste:

Apply ½ kg (1.1 lb) of MANUGEST weekly for each 40 hogs.

For Cattle Waste:

Apply 1 kg (2.2lb) of MANUGEST weekly for each 10 head.

CAUTION: contains yeast. Do not feed to ruminant animals.

Frequent application to collector systems reduces barn odours and flies.

Double-dose initially to ensure rapid start-up.
