

STOPS ODOURS!

MANUGEST®

**ACTIVATOR AND
DIGESTER FOR**

DOG WASTE COMPOSTING

MANUGEST works effectively in all consumer or commercial waste digestion systems sold in pet departments.

HARMLESS TO HUMANS AND ANIMALS

Regular use of MANUGEST generates efficient and reliable waste digestion of dog compost. Eliminates odours and flies. Natural ingredients. 100% biodegradable!

DIRECTIONS

Home Yard Use: Choose a backyard location apart from any vegetable garden, fruit trees or tree roots. Avoid clay soil. Dig a hole (14"-18" deep) in the ground large enough to bury a bin, pail, basket or old garbage can, flush with the surface, with the bottom cut out. Drill holes in its sides. Place some stones or gravel in the bottom of the hole for drainage. Deposit dog waste. Add about ½ litre of water, sprinkle ¼ cup (30g) of MANUGEST over the waste. Cover with a lid. Allow 48 hours. Repeat process. Add dog waste regularly. Dose waste with ¼ cup (30g) of MANUGEST weekly. For 2 or more dogs, double dose weekly. Lower temperatures retard bacteria growth. Check local laws about how far this digester should be placed from a well.

Kennel Use: For odour prevention and waste reduction sprinkle MANUGEST over the dog run or cat litter. MANUGEST will not harm animals in any way. Apply 1 cup (120g) initially to moistened waste in holding pit and dose with ½ cup (60g) weekly or as needed.

CAUTION: Always use gloves when handling waste and wash hands. Pregnant women and young children should avoid contact with animal waste, particularly cat litter. Never use liquid waste as fertilizer for edible plants, vegetables or fruit trees.

Naturally Powerful - Totally Safe!®
